

KFS/RBMA Content Distribution Service User Guide

The new Content Distribution Service (CDS) is easy to use and will enable faster access to content files, including improved sorting capabilities, the ability to filter by date and format, and the ability to group and add files to a queue.

This user guide is intended to help users navigate the KFS “CDS” system. This is the new user portal for customers of King Features or Reed Brennan Media Associates to download assets, or paginated pages. The CDS portal replaces the legacy “BBS” user portal.

Logging in to the CDS

1. Web Site Address <https://cds.kingfeatures.com/>
2. Enter user name and password
3. Click Login

The screenshot shows a login interface with a light blue background. At the top center, the word "Login" is displayed in bold black text. Below this, a dark green rectangular box contains the login form. Inside the box, the text "User ID:" is followed by a white input field containing the text "JeanLucPicard". Below that, the text "Password:" is followed by a white input field filled with dots, and a small blue padlock icon to its right. At the bottom of the green box is a large blue button with the word "Login" in white text.

6. Filter View Options
7. How to contact us
(Hours 8-5 M-F Eastern Time)

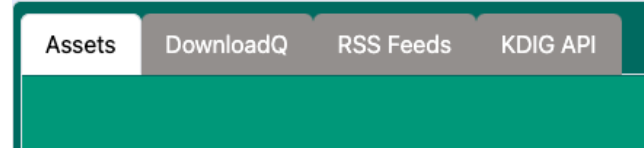

1. This menu item gives you the option to log out, or view or change items in your user profile.

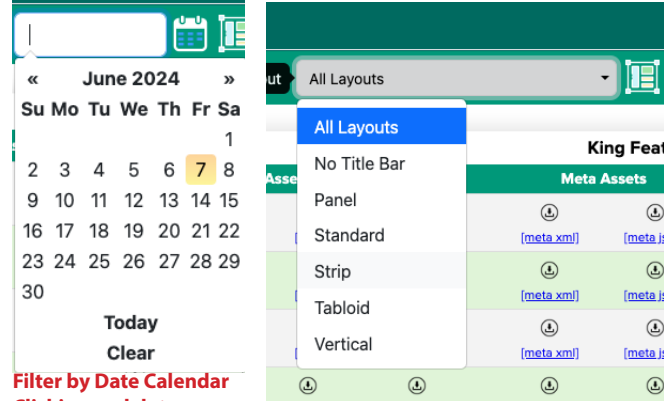

5. This drop down menu lists all the assets the account has an active subscription to download. Clicking on any of the features will show that asset in the list.

2. Use the Tabs to navigate to other screens.

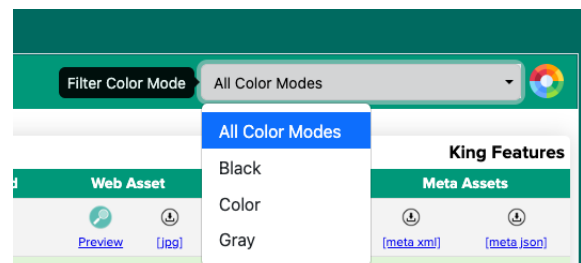

6. Using Filters will help narrow down the list to show you specific features. We offer 3 filter options.
1. Filter by Date: 2. Filter by Format: 3. Filter by Color:

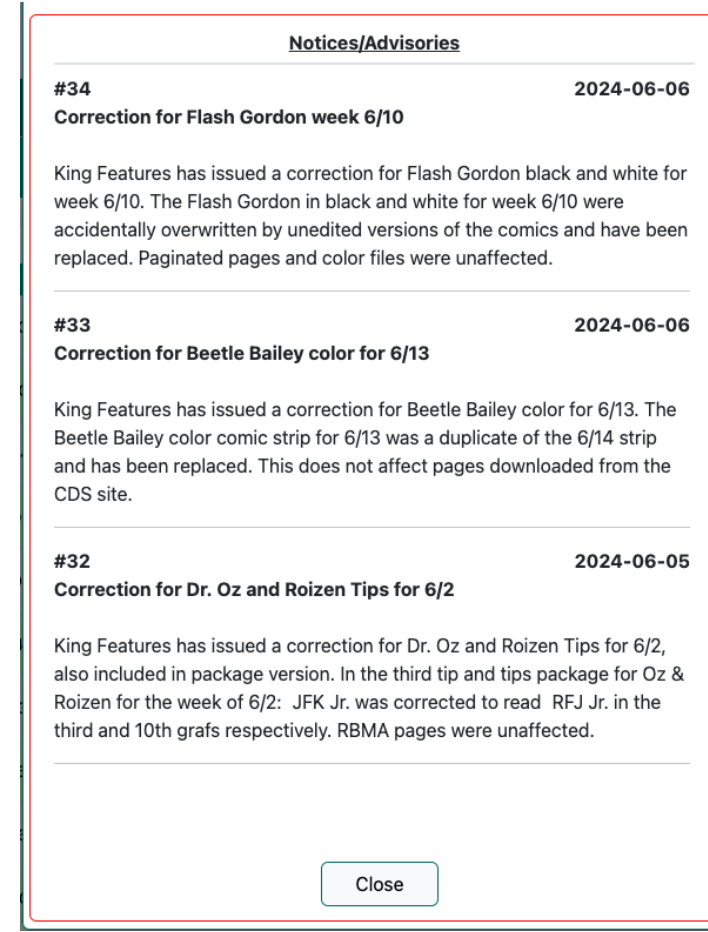

Filter by Date Calendar Clicking and date changes the list to only display the selected date. Date Ranges are not currently supported.

Filter by Layout Clicking this option shows you all the layout formats that are available for this asset. Choose the format in the drop down to display only that format in the list.

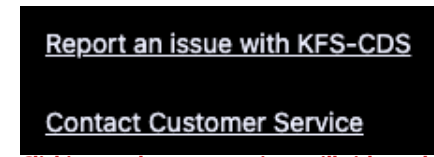

Filter by Color Mode. Clicking on any of these options in the drop down will display only the assets that are available in that color space.

3. Users will find important announcements here.

7. How to contact us.

Clicking on these two options will either take you to a web form to fill out for assistance, or display the phone number for our customer success team.

Assets Available: 7

Feature filtered by Date:

When viewing one specific feature you see all the available assets for that feature. Assets are available for download in two file formats. .jpg for Online usage and .tif for print publications. Click on the download icon to save that format to your local computer.

Feature filtered by Date:

For users with highly automated workflows we also offer meta data downloads in either XML or JSON formats. Clicking on these download icons will deliver you the meta-data file.

User Navigation Batch Download

The screenshot shows the 'DownloadQ' interface. At the top, there are navigation tabs: 'Assets', 'DownloadQ', 'RS Feeds', and 'KDIG API'. The 'DownloadQ' tab is selected and circled in red. Below the tabs, the 'DownloadQ' title is displayed, followed by a description: 'Provides the ability to compress and download multiple assets.' and instructions: 'Add or remove Original Assets in the DownloadQ, from the Assets Tab, by clicking the icon under the DownloadQ column.' and 'Return here to create the compressed zip file and download.' Below this is a table titled 'Assets in the Q'. The table has columns for 'ID', 'File Name', and 'Remove'. The 'Remove' column contains green double arrows pointing left. A 'Download the Q' button is circled in green at the top right of the table. A 'Clear the Q' link is also visible at the top right.

ID	File Name	Remove
4100232	dailyComics.76.06102024.Mon.pdf	←←
4100370	dailyComics.76.06112024.Tue.pdf	←←
4100344	dailyComics.76.06122024.Wed.pdf	←←
4100368	dailyComics.76.06132024.Thu.pdf	←←
4100438	dailyComics.76.06142024.Fri.pdf	←←
4100440	dailyComics.76.06152024.Sat.pdf	←←

Batch Downloads: (1)

Clicking on the DownloadQ tab will change the navigation screen to display the files batched for download.

Batch Downloads: (2)

When ready click on the "Download the Q" icon. After clicking the icon a "Pop" up window will validate the download.

An embedded page at fds.kingfeatures.com says
A large number of assets in the DownloadQ may take several seconds or minutes to prepare. You need to stay on this page until the process is complete and you see the download link.
OK

Batch Downloads: (3)

When Assets are batched and ready for user download the screen will change to display the download icon.

Your file is ready. Click here to start the download.
Changing Tabs will abandon the download.

Batch Downloads: (5)

Clicking the "Q" icon will download the zipped file to your local computer.

King Data Interchange Gateway - KDIG
Application Programming Interface (API) for JSON or XML Data Access

KDIG can be used to:

- Download assets.
- Import images and data into a CMS to support easy access for content inclusion or search functionality.
- Access web-ready, shareable links.
- Populate websites - Just like this one!

That's right, this website is built using KDIG as a resource. The assets available, in the Assets Tab, are the same ones available for automation via our API -> KDIG.

Want to know more? [Download the documentation](#) for additional information.

Asset Delivery Network - ADN
Asset Resource Repository

You'll see references to 'adn.kingfeatures.net' in KDIG data. That is the basic URL where assets reside. All requests for assets are derived/delivered from the ADN.

Advanced Features:
The RSS tab displays the links to use assets as part of a RSS feed into another system.
The KDIG API tab will give you guidance for using either the XML or JSON feeds. Both of these features are in beta testing. Contact the team ad KFS for further guidance.
